

INDEX BY AUTHORS

- Abbott, Allan.
Unit of instruction on Van Dyke's "Fisherman's Luck." XXVI, Feb. 1933, 98-99.
- Altshiller-Court, Nathan.
Tetrahedron and its circumscribed parallelepiped. XXVI, Feb. 1933, 46-52.
- Anning, Norman.
High school mathematics club. XXVI, Feb. 1933, 70-76.
- Bagley, William C.
Ideal preparation of a teacher of secondary mathematics from the point of view of an educationist. XXVI, May, 1933, 271-276.
- Beatley, Ralph.
Second Report of the Committee on Geometry. XXVI, Oct. 1933, 366-371.
- Benz, H. E.
Scientific investigations of the teaching of high school mathematics reported in 1932. XXVI, Oct. 1933, 372-381.
- Blaisdell, Walter H.
Daily testing. XXVI, April 1933, 227-234.
- Botsford, Stephen J.
Real life experiences in the school. XXVI, Jan. 1933, 40-45.
- Bradshaw, John W.
Drawing for teachers of solid geometry. Part Four. XXVI, March 1933, 140-145.
- Breslich, E. R.
Secondary mathematics and the changing curriculum. XXVI, Oct. 1933, 327-349.
- Brown, Christine A.
Real business in the eighth grade. XXVI, March 1933, 129-132.
- Campbell, Alan D.
Some questions on methods of teaching for a teacher's own self analysis. XXVI, April 1933, 239-240.
- Christofferson, H. C.
The Plane Geometry Scholarship Tests in Ohio. XXVI, Dec. 1933, 457-466.
- Crathorne, A. T.
Problem of mathematical statistics. XXVI, April 1933, 200-209.
- Crum, W. L.
Uses of statistics in the social sciences. XXVI, April 1933, 210-221.
- Fehr, Howard F.
Quadratic equation. XXVI, March 1933, 146-149.
- Fields, Margaret.
Practical mathematics of Roman times. XXVI, Feb. 1933, 77-84.
- Garver, Raymond.
Mathematical induction. XXVI, Feb. 1933, 65-69.
- Georges, J. S.
Supplementary projects: purpose. XXVI, May 1933, 283-285.
Supplementary projects: procedure. XXVI, Dec. 1933, 467-470.
- Goodrich, Merton Taylor.
Should mathematics teachers seek to know the needs of society? XXVI, April 1933, 241-242.
- Gorsline, W. W.
Slide rule in junior college. XXVI, May 1933, 292-295.
- Hartung, Maurice L.
Graphic interpretation of equations involving reciprocals. XXVI, April 1933, 237-238.
- Hassler, J. O.
Report of the Policy Committee. XXVI, Dec. 1933, 492-494.
- Hedges, Blanche.
Alice in numberland. XXVI, April 1933, 222-226.

Jablonower, Joseph.

The Jabberwocky was a lark or the mathematician takes a holiday. XXVI, May 1933, 302-306.

Johnson, J. T.

Adapting instructional materials to individual differences in learning. XXVI April 1933, 193-199.

Kunkel, Paul V.

A Study of Davies' University Arithmetic, 1846. XXVI, Dec. 1933, 471-476.

Lazar, Nathan.

One unknown or two? XXVI, March 1933, 176-182.

Longley, W. R.

Function concept in algebra. XXVI, Jan. 1933, 5-19.

Mallory, Virgil.

Mathematics for the slow moving pupil. XXVI, Nov. 1933, 391-398.

Mitchell, U. G.

Does mathematics condition human progress? XXVI, May 1933, 296-301.

Moore, Lillian

Mathematics Exhibit—World's Fair Chicago. XXVI, Dec. 1933, 482-486.

Nyberg, Joseph A.

Proofs of $\sin(a+b)$ and $\cos(a+b)$. XXVI, Nov. 1933, 399-404.

Orleans, Joseph B.

Demonstrative geometry in the ninth year. XXVI, Feb. 1933, 100-103.

Teaching and learning. XXVI, March 1933, 133-139.

— See Stokes, C. N.

Prendergast, Ella M.

Mathematics and social science. XXVI, Jan. 1933, 33-39.

Rafferty, Gerald.

Eternal triangle. XXVI, Feb. 1933, 85-92.

Reeve, W. D.

Demonstrative geometry for the ninth grade. XXVI, March 1933, 150-162.

What is wrong with Teachers of Mathematics? XXVI, Dec. 1933, 455-456.

Riggs, F. B.

Should children help each other in arithmetic? XXVI, April 1933, 235-236.

Rosendahl, Mary Kathryn.

Banquet of the angles. XXVI, March 1933, 186.

Russell, Celia A.

More than one mystery. XXVI, Dec. 1933, 477-481.

Sanford, Vera

Christiaan Huygens. XXVI, Jan. 1933, 52-53.

Edmund Halley. XXVI, April 1933, 243-246.

Gottfried Wilhelm Leibniz. XXVI, March 1933, 183-185.

Guillaume Francois Antoine de l'Hospital. XXVI, May 1933, 306-307.

Jacques Bernoulli. XXVI, Oct. 1933, 382-384.

Jean Bernoulli. XXVI, Dec. 1933, 486-489.

Sir Isaac Newton. XXVI, Feb. 1933, 106-109.

— See Walker, Helen M.

Schnell, Leroy H.

Attempt to apply the principles of progressive education to the teaching of geometry. XXVI, March 1933, 163-175.

Schorling, Raleigh.

Report of the Committee on Individual Differences. XXVI, Oct. 1933, 350-365.

Schreiber, Edwin W.

Fourteenth annual meeting of the National Council of Teachers of Mathematics. XXVI, Nov. 1933, 409-423.

Shoesmith, Beulah I.

What do we owe to the brighter pupil? XXVI, Jan. 1933, 20-32.

Sister M. Gertrude, O. P.

The Mathematics Teacher. XXVI, May 1933, 312.

Smith, Alice K.

Play: the Case of Matthew Mattix. XXVI, May 1933, 286-291.

- Smith, David Eugene.
 Address as Retiring President of the International Commission on the Teaching of Mathematics. XXVI, Feb. 1933, 94-97.
 Eliakim Hastings Moore. XXVI, Feb. 1933, 109-110.
- Stelson, H. E.
 Principle of fractions in arithmetic. XXVI, Feb. 1933, 104.
- Stokes, C. N. and Joseph B. Orleans.
 Tentative program for the subcommittee on administrative phases or the individual differences problem. XXVI, Jan. 1933, 57-59.
- Walker, Helen M.
 Unit of instruction on Van Dyke's "Fisherman's Luck." Supplement. XXVI, Feb. 1933, 99.
 ——— and Vera Sanford.
 Abraham de Moivre. XXVI, Nov. 1933, 424-429
- Wattawa, Virginia.
 Reading in mathematics. XXVI, May 1933, 277-282.
- Webb, Harrison E.
 Central objectives of the educational process. XXVI, Nov. 1933, 405-408.
- Whitcraft, L. H.
 Influence of the college entrance examinations on the teaching of secondary mathematics. XXVI, May 1933, 257-270
- Woodford, E. B.
 Teaching the locus concept in plane geometry. XXVI, Feb. 1933, 105-106.

Books for Teachers of Mathematics

The Professional Treatment of the Subject Matter of Arithmetic for Teacher-Training Institutions. By Elias A. Bond, Ph.D. 250 pp. Cloth, \$2.50. This book includes a discussion of desirable materials, time allowance, methods of administering, and the nature of other courses in mathematics that would contribute to a professional course in arithmetic for those preparing to teach this subject in the first six grades.

The Geometry of Repeating Design and Geometry of Design for High Schools. By A. Day Bradley, Ph.D. 131 pp. Cloth, \$1.50. An interpretation of the rather large and scattered body of mathematical literature concerning the geometric basis of certain types of design, and a presentation of this material, with original additions, from the standpoint of its applications to professionalized subject matter and courses in high school geometry. Vitalizing material for high school geometry is presented by means of numerous sets of exercises incorporated in sequence of standard theorems.

Mathematical Difficulties of Students of Educational Statistics. By Ralph Brown, Ph.D. 61 pp. Cloth, \$1.50. This study aims to determine mathematical concepts and skills needed in a beginning course in educational statistics, to ascertain the common mathematical difficulties of students of statistics, and to measure the relationship between mathematical ability and success in statistics. Measures for mitigating mathematical difficulties are suggested.

Mathematical Facts and Processes Prerequisite to the Study of the Calculus. By William Henry Fagerstrom, Ph.D. 68 pp. Cloth, \$1.50. It was the purpose of this study to ascertain to what extent the facts, principles, formulas, and processes of secondary mathematics, as required by the College Entrance Examination Board, are used in the solution of problems of the calculus. The findings provide a basis for adjustments in the present form of the curriculum of secondary mathematics.

Some Influences of the Requirements and Examinations of the College Entrance Examination Board on Mathematics in Secondary Schools of the United States. By Leslie Harper Whitcraft, Ph.D. 115 pp. Cloth, \$1.50. It was the purpose of this study to determine the nature and extent of the influence of the requirements and annual examinations of the College Entrance Examination Board upon the mathematics of the secondary schools of the United States. The textbook, the course of study, the curriculum, the student, the administrator, the teacher, and the examination each receive careful consideration.
